

CONSUMER CONFIDENCE REPORT

Report Covers Calendar Year: January 1 – December 31, 2018

Este informe contiene información muy importante sobre el agua que usted bebe. Tradúscalo o hable con alguien que lo entienda bien.

I. Public Water System (PWS) Information

PWS Name:	Granite Oaks Water Users Association				
PWS ID #	AZ04 13155				
Owner / Operator Name:	Granite Oaks Water Users Association/ Pat Carpenter				
Telephone #	(928) 606-0498	Fax #	(928) 635-2126	E-mail	pataqualitywater@gmail.com
We want our valued customers to be informed about their water quality. If you would like to learn more about this report, please contact Pat Carpenter @ 928-606-0498					

II. Drinking Water Sources

The sources of drinking water (both tap and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Our water source(s):	Groundwater/wells
----------------------	-------------------

III. Consecutive Connection Sources

A public water system that receives some or all of its finished water from one or more wholesale systems by means of a direct connection or through the distribution system of one or more consecutive systems. Systems that purchase water from another system report regulated contaminants detected from the source water supply in a separate table. PWS ID # AZ04 -13155 DOES NOT provide a consecutive connection source of water.

IV. Drinking Water Contaminants

Microbial contaminants, such as viruses and bacteria that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
Inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.

Pesticides and herbicides that may come from a variety of sources, such as agriculture, urban stormwater runoff, and residential uses.

Organic chemical contaminants, including synthetic and volatile organic chemicals, which are byproducts of industrial processes and petroleum production, and also may come from gas stations, urban stormwater runoff, and septic systems.

Radioactive contaminants, that can be naturally occurring or be the result of oil and gas production and mining activities.

V. Vulnerable Population

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk of infections. These people should seek advice about drinking water from their health care providers. For more information about contaminants and potential health effects, or to receive a copy of the U.S. Environmental Protection Agency (EPA) and the U.S. Centers for Disease Control (CDC) guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and microbiological contaminants call the EPA *Safe Drinking Water Hotline* at 1-800-426-4791.

VI. Source Water Assessment

If the public water system received a Source Water Assessment (SWA), include a brief summary of the susceptibility as summarized in the SWA report. Further source water assessment documentation can be obtained by contacting ADEQ, 602-771-4641.

VII. Definitions

AL = Action Level - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements.

MCL = Maximum Contaminant Level - The "Maximum Allowed" is the highest level of a contaminant that is allowed in drinking water.

MCLG = Maximum Contaminant Level Goal - The "Goal" is the level of a contaminant in drinking water below which there is no known or expected risk to health.

MFL = Million fibers per liter.

MRDL = Maximum Residual Disinfectant Level.

MRDLG = Maximum Residual Disinfectant Level Goal.

MREM = Millirems per year – a measure of radiation absorbed by the body.

NA = Not Applicable, sampling was not completed by regulation or was not required.

NTU = Nephelometric Turbidity Units, a measure of water clarity.

PCi/L = Picocuries per liter - picocuries per liter is a measure of the radioactivity in water.

ppm x 1000 = ppb

ppb x 1000 = ppt

ppt x 1000 = ppq

PPM = Parts per million or Milligrams per liter (mg/L).

PPB = Parts per billion or Micrograms per liter (µg/L).

PPT = Parts per trillion or Nanograms per liter.

PPQ = Parts per quadrillion or Picograms per liter.

TT = Treatment Technique - A treatment technique is a required process intended to reduce the level of a contaminant in drinking water.

VIII. Health Effects Language

Nitrate in drinking water at levels above 10 ppm is a health risk for infants of less than six months of age. High nitrate levels in drinking water can cause blue baby syndrome. Nitrate levels may rise quickly for short periods-of-time because of rainfall or agricultural activity. If you are caring for an infant, and detected nitrate levels are above 5 ppm, you should ask advice from your health care provider.

If **arsenic** is less than or equal to the MCL, your drinking water meets EPA's standards. EPA's standard balances the current understanding of arsenic's possible health effects against the costs of removing arsenic from drinking water. EPA continues to research the health effects of low levels of arsenic, which is a mineral known to cause cancer in humans at high concentrations and is linked to other health effects such as skin damage and circulatory problems.

Infants and young children are typically more vulnerable to **lead** in drinking water than the general population. It is possible that lead levels at your home may be higher than at other homes in the community as a result of materials used in your home's plumbing. If you are concerned about elevated lead levels in your home's water, you may wish to have your water tested. Flush your tap for 30 seconds to 2 minutes before using tap water. Additional information is available from the EPA *Safe Drinking Water Hotline* at 1-800-426-4791.

IX. Water Quality Data

Contaminant (units)	Violation Y / N	Highest Level Detected	Range Detected Absent (A) or Present (P)	MCL	MCLG	Sample Month Year	Likely Source of Contamination
Microbiological							
Total Coliform Bacteria (System takes ≥ 40 monthly samples) 5% of monthly samples are positive; (System takes ≤ 40 monthly samples) 1 positive monthly sample	N	zero	A	0	0	Monthly (2018)	Naturally Present in Environment
Fecal coliform and E. Coli (TC Rule)	N			0	0		Human and animal fecal waste
Fecal Indicators (E. coli, enterococci or coliphage) (GW Rule)	N			TT	n/a		Human and animal fecal waste
Total Organic Carbon (ppm)				TT	n/a		Naturally present in the environment
Turbidity (NTU), surface water only				TT	n/a		Soil Runoff
Disinfectants							
Chloramines (ppm)				MRDL = 4	MRDLG = 4		Water additive used to control microbes
Chlorine (ppm)	N	0.49mg/l		MRDL = 4	MRDLG = 4	Daily (2018)	Water additive used to control microbes
Chloride dioxide (ppb)				MRDL = 800	MRDLG = 800		Water additive used to control microbes
Disinfection By-Products							
Haloacetic Acids (ppb) (HAA5)	N	0.0054	L	60		7/23/2018	Byproduct of drinking water disinfection
Total Trihalomethanes (ppb) (TTHM)	N	0.0258	L	80		7/23/2018	Byproduct of drinking water disinfection
Bromate (ppb)							Byproduct of drinking water disinfection
Chlorite (ppm)							Byproduct of drinking water disinfection
Lead & Copper							
Copper (ppm)	N	90 th percentile 0.009 ppm	L	AL= 1.3	ALG = 1.3	09/20/18	Corrosion of household plumbing systems; erosion of natural deposits
Lead (ppm)	N	90 th percentile <0.001	L	AL= 15	0	09/20/18	Corrosion of household plumbing systems; erosion of natural deposits
Radionuclides							
Beta / photon emitters (mrem/yr)				4	0		Decay of natural and man-made deposits
Alpha emitters (pCi/L)	N	<3	L	15	0	6/7/2017	Erosion of natural deposits
Combined Radium 226 & 228 (pCi/L)	N	<1	L	5	0	6/7/2017	Erosion of natural deposits
Uranium (pCi/L)				30	0		Erosion of natural deposits
Inorganics							
Antimony (ppb)	N	<0.5		6		02/2013	Discharge from petroleum refineries; fire retardants; ceramics, electronics and solder
Arsenic (ppb)	N	3.5		10		02/2013	Erosion of natural

							deposits, runoff from orchards, runoff from glass and electronics production wastes
Asbestos (MFL)	N	<0.2	L	7		07/2014	Decay of asbestos cement water mains; Erosion of natural deposits
Barium (ppm)	N	0.01	L	2		02/2013	Discharge of drilling wastes; discharge from metal refineries; Erosion of natural deposits
Beryllium (ppb)	N	<2	L	4		02/2013	Discharge from metal refineries and coal-burning factories; discharge from electrical, aerospace, and defense industries
Cadmium (ppb)	N	<0.1	L	5		02/2013	Corrosion of galvanized pipes; natural deposits; metal refineries; runoff from waste batteries and paints
Chromium (ppb)	N	<5	L	100		02/2013	Discharge from steel and pulp mills; Erosion of natural deposits
Cyanide (ppb)	N	<10	L	200		07/2012	Discharge from steel/metal factories; Discharge from plastic and fertilizer factories
Fluoride (ppm)	N	0.36	L	4	4	02/2013	Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories
Mercury (ppb)	N	<0.20	L	2	2	02/2013	Erosion of natural deposits; Discharge from refineries and factories; Runoff from landfills and cropland.
Nitrate (ppm)	N	2.5	L	10	10	04/06/18	Runoff from fertilizer use; leaching from septic tanks, sewage; erosion of natural deposits
Nitrite (ppm)	N	<0.10	L	1	1	07/2017	Runoff from fertilizer use; leaching from septic tanks, sewage; erosion of natural deposits
Selenium (ppb)	N	3.0	L	50	50	02/2013	Discharge from petroleum and metal refineries; erosion of natural deposits; discharge from mines
Thallium (ppb)	N	<0.05	L	2	0.5	02/2013	Leaching from ore-processing sites; discharge from electronics, glass, and drug factories
Synthetic Organic Contaminants							
2,4-D (ppb)	N	<0.10	L	70	70	02/2013	Runoff from herbicide used on row crops
2,4,5-TP (Silvex) (ppb)	N	<0.20	L	50	50	02/2013	Residue of banned herbicide

Acrylamide				TT	0		Added to water during sewage / wastewater treatment
Alachlor (ppb)	N	<0.20	L	2	0	02/2013	Runoff from herbicide used on row crops
Atrazine (ppb)	N	<0.10	L	3	3	02/2013	Runoff from herbicide used on row crops
Benzo (a) pyrene (PAH) (ppt)	N	<0.02	L	200	0	02/2013	Leaching from linings of water storage tanks and distribution lines
Carbofuran (ppb)	N	<0.90	L	40	40	02/2013	Leaching of soil fumigant used on rice and alfalfa
Chlordane (ppb)	N	<0.20	L	2	0	02/2013	Residue of banned termiticide
Dalapon (ppb)	N	<1.0	L	200	200	02/2013	Runoff from herbicide used on rights of way
Di (2-ethylhexyl) adipate (ppb)	N	<0.60	L	400	400	02/2013	Discharge from chemical factories
Di (2-ethylhexyl) phthalate (ppb)	N	<0.60	L	6	0	02/2013	Discharge from rubber and chemical factories
Dibromochloropropane (ppt)	N	<0.00002	L	200	0	02/2013	Runoff/leaching from soil fumigant used on soybeans, cotton, pineapples, and orchards
Dinoseb (ppb)	N	<0.20	L	7	7	02/2013	Runoff from herbicide used on soybeans and vegetables
Diquat (ppb)	N	<0.40	L	20	20	02/2013	Runoff from herbicide use
Dioxin [2,3,7,8-TCDD] (ppq)				30	0		Emissions from waste incineration and other combustion; discharge from chemical factories
Endothall (ppb)	N	<9.0	L	100	100	02/2013	Runoff from herbicide use
Endrin (ppb)	N	<0.01	L	2	2	02/2013	Residue of banned insecticide
Epichlorohydrin				TT	0		Discharge from industrial chemical factories; an impurity of some water treatment chemicals
Ethylene dibromide (ppt)				50	0		Discharge from petroleum refineries
Glyphosate (ppb)				700	700		Runoff from herbicide use
Heptachlor (ppt)	N	<0.04	L	400	0	02/2013	Residue of banned temiticide
Heptachlor epoxide (ppt)	N	<0.02	L	200	0	02/2013	Breakdown of heptachlor
Hexachlorobenzene (ppb)	N	<0.10	L	1	0	02/2013	Discharge from metal refineries and agricultural chemical factories

Hexachlorocyclo pentadiene (ppb)	N	<0.10	L	50	50	02/2013	Discharge from chemical factories
Lindane (ppt)				200	200		Runoff/leaching from insecticide used on cattle, lumber, gardens
Methoxychlor (ppb)	N	<0.10	L	40	40	02/2013	Runoff/leaching from insecticide used on fruits, vegetables, alfalfa, livestock
Oxamyl [Vydate] (ppb)	N	<2.0	L	200	200	02/2013	Runoff/leaching from insecticide used on apples, potatoes and tomatoes
PCBs [Polychlorinated biphenyls] (ppt)	N	<1.0	L	500	0	02/2013	Runoff from landfills; discharge of waste chemicals
Pentachlorophenol (ppb)	N	<0.04		1	0	02/2013	Discharge from wood preserving factories
Picloram (ppb)	N	<0.10		500	500	02/2013	Herbicide runoff
Simazine (ppb)	N	<0.07		4	4	02/2013	Herbicide runoff
Toxaphene (ppb)	N	<1.0		3	0	02/2013	Runoff/leaching from insecticide used on cotton and cattle
Volatile Organics							
Benzene (ppb)	N	<0.50	L	5	0	05/2017	Discharge from factories; leaching from gas storage tanks and landfills
Carbon tetrachloride (ppb)	N	<0.50	L	5	0	05//2017	Discharge from chemical plants and other industrial activities
Chlorobenzene (ppb)	N	<0.50	L	100	100	05/2017	Discharge from chemical and agricultural chemical factories
o-Dichlorobenzene (ppb)	N	<0.50	L	600	600	05/2017	Discharge from industrial chemical factories
p-Dichlorobenzene (ppb)	N	<0.50	L	75	75	05/2017	Discharge from industrial chemical factories
1,2-Dichloroethane (ppb)	N	<0.50	L	5	0	05/2017	Discharge from industrial chemical factories
1,1-Dichloroethylene (ppb)	N	<0.50	L	7	7	05/2017	Discharge from industrial chemical factories
cis-1,2-Dichloroethylene (ppb)	N	<0.50	L	70	70	05/2017	Discharge from industrial chemical factories
trans-1,2-Dichloroethylene (ppb)	N	<0.50	L	100	100	05/2017	Discharge from industrial chemical factories
Dichloromethane (ppb)	N	<0.50	L	5	0	05/2017	Discharge from pharmaceutical and chemical factories
1,2-Dichloropropane (ppb)	N	<0.50		5	0	05/2017	Discharge from industrial chemical

							factories
Ethylbenzene (ppb)	N	<0.50	L	700	700	05/2017	Discharge from petroleum refineries
Styrene (ppb)	N	<0.50	L	100	100	05/2017	Discharge from rubber and plastic factories; leaching from landfills
Tetrachloroethylene (ppb)	N	<0.50	L	5	0	05/2017	Discharge from factories and dry cleaners
1,2,4-Trichlorobenzene (ppb)	N	<0.50	L	70	70	05/2017	Discharge from textile-finishing factories
1,1,1-Trichloroethane (ppb)	N	<0.50	L	200	200	05/2017	Discharge from metal degreasing sites and other factories
1,1,2-Trichloroethane (ppb)	N	<0.50	L	5	3	05/2017	Discharge from industrial chemical factories
Trichloroethylene (ppb)	N	<0.50	L	5	0	05/2017	Discharge from metal degreasing sites and other factories
Toluene (ppm)	N	<0.50	L	1	1	05/2017	Discharge from petroleum factories
Vinyl Chloride (ppb)	N	<0.30	L	2	0	05/2017	Leaching from PVC piping; discharge from chemical factories
Xylenes (ppm)	N	<0.50	L	10	10	05/2017	Discharge from petroleum or chemical factories

X. *Cryptosporidium* Monitoring (surface water systems only)

We detected *Cryptosporidium* in the finished water or source water. We detected *Cryptosporidium* in ____ of our ____ samples tested.

We do not test for *Cryptosporidium*

We have to provide additional treatment if *Cryptosporidium* is found at greater than 0.075 oocyst per liter.

We believe it is important for you to know that *Cryptosporidium* may cause serious illness in immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders. These people should seek advice from their health care providers.

XI. Stage 2 Disinfectants and Disinfection By-products Rule

Stage 2 DBP Rule requires some systems to complete an Initial Distribution System Evaluation (IDSE) to characterize DBP levels in their distribution systems and identify locations to monitor DBPs for Stage 2 DBP Rule compliance. The following table summarizes the individual sample results for the IDSE monitoring in 2009:

Contaminant	Number of Analyses	Minimum Level Detected	Highest Level Detected
Haloacetic Acids (HAA5) (ppm)	1	0.0054	0.0054
Total Trihalomethanes (TTHM) (ppm)	1	0.0258	0.0258

XII. Violations

Type / Description	Compliance Period	Corrective Actions taken by PWS
NONE		

An explanation of the violation(s) in the above table, the steps taken to resolve the violation(s) and any required health effects information are required to be included with this report. (Attach copy of Public Notice if available.)
